EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Pursuant to MPEP § 606.01, the title has been changed to --**MAGNETO-RESISTANCE EFFECT ELEMENT WITH MAGNETISM SENSITIVE REGION CONTROLLED BY VOLTAGE APPLIED TO GATE ELECTRODE**--.

2. The following is an examiner's statement of reasons for allowance: The prior art of record neither shows nor suggests a gate electrode positioned adjacent to an insulating layer in a magnetoresistance effect element wherein a magnetism sensitive region is controlled by a voltage applied to the gate electrode.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Seigler (US PAP No. 2005/0117263 A1) shows a magnetic read sensor wherein an electrode positioned adjacent an edge of a magnetic sensing structure adjustably controls an area

of the magnetic sensing structure through which current can flow (see especially Fig. 4); however, the reference was filed on December 1, 2003, after Applicant's U.S. filing date.

4. Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only.
